

BUILT-IN MICROWAVE OVEN

Built-in microwave ovens are nowadays an indispensable appliance in any modern built-in kitchen. They facilitate daily catering and satisfy the growing needs for both tasty and healthy eating for those on-the-go.

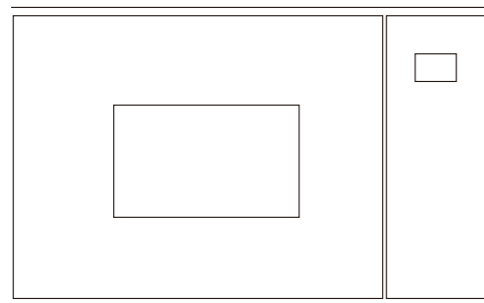

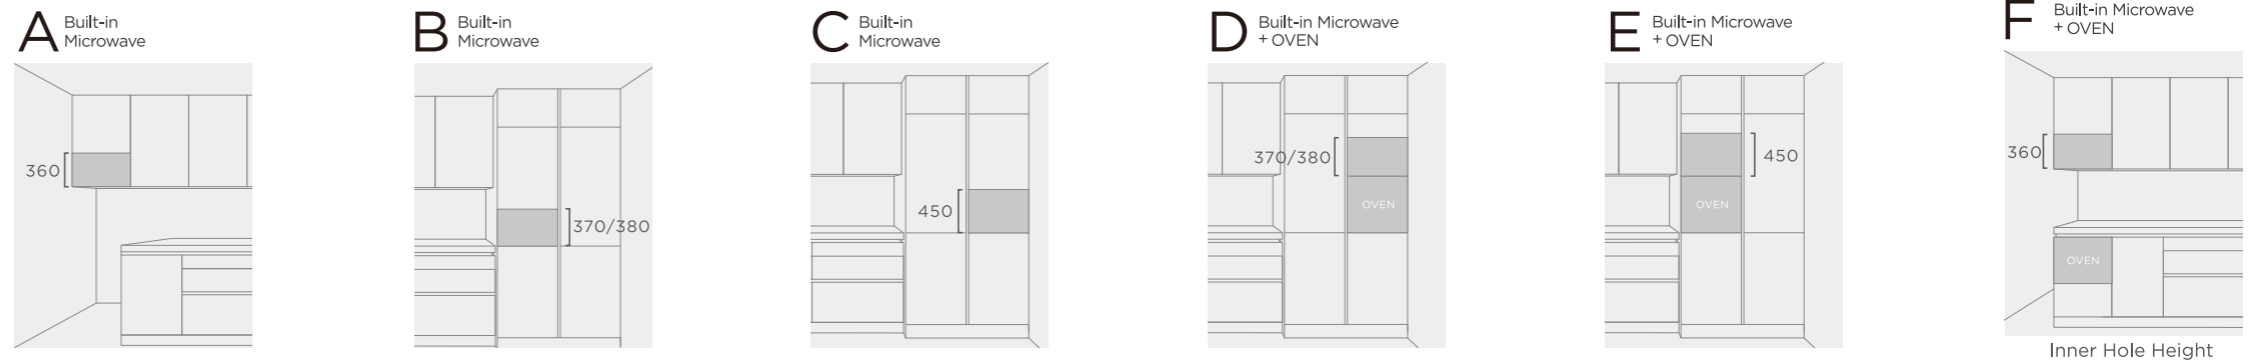

Equipped with user friendly functions derived from advanced technologies, Midea built-in microwave oven seamlessly integrates into any kitchen, offering perfect cooking experience.

Satisfaction In Many Ways

Suitable For Different Decorations Style

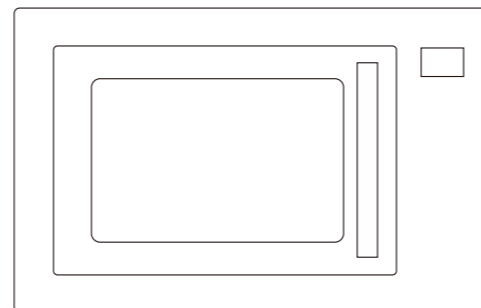

The built-in microwave ovens will perfectly integrate with other Midea kitchen ovens whether inlaid in the cabinet or as stand alone on a shelf.

Aurora Frameless Built-in Series

Integrated appearance escapes from the conventional design, making it a true masterpiece in your kitchen.

Aurora Series

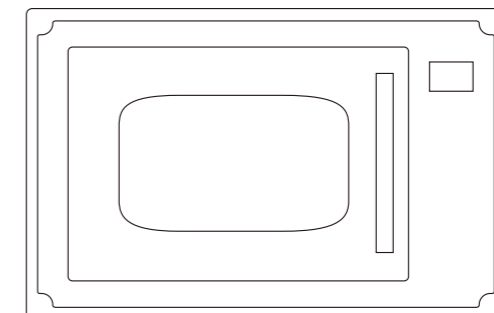

Awarded-design Series

Midea is dedicated to stay at the forefront of innovation by creating solutions that meet and exceed customer expectations.

Awarded-design Series

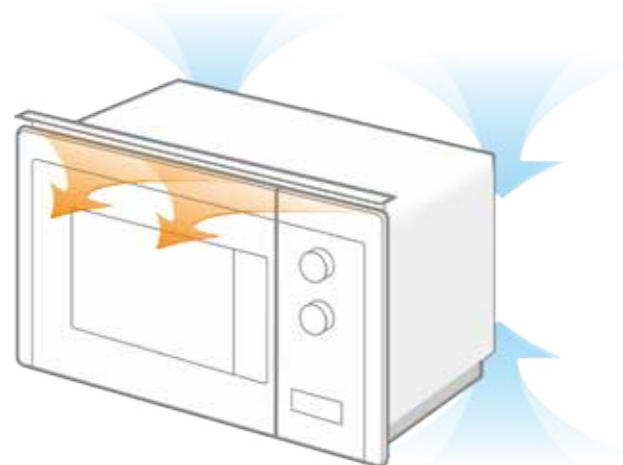

Retro Line Series

Timeless design is available with either electric or mechanical

Retro Series

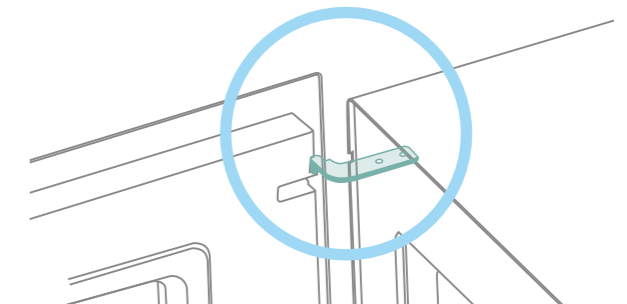

Optimum Air Flow

The new design of hot air flow channel from the exhaust lowers down the bottom temperature of the cabinet, which meets the AMK standard (German cabinet temperature standard).

Optimum Hinge

Hinges are the critical component for door structure. We use the manganese-based alloys to strengthen the mechanical properties for the long-lasting durability.

COMPACT OVEN

20% Faster* with microwave assisted

Compared with traditional oven, compact oven with microwave assisted in cooking can significantly reduce cooking time.

*Midea internal lab report

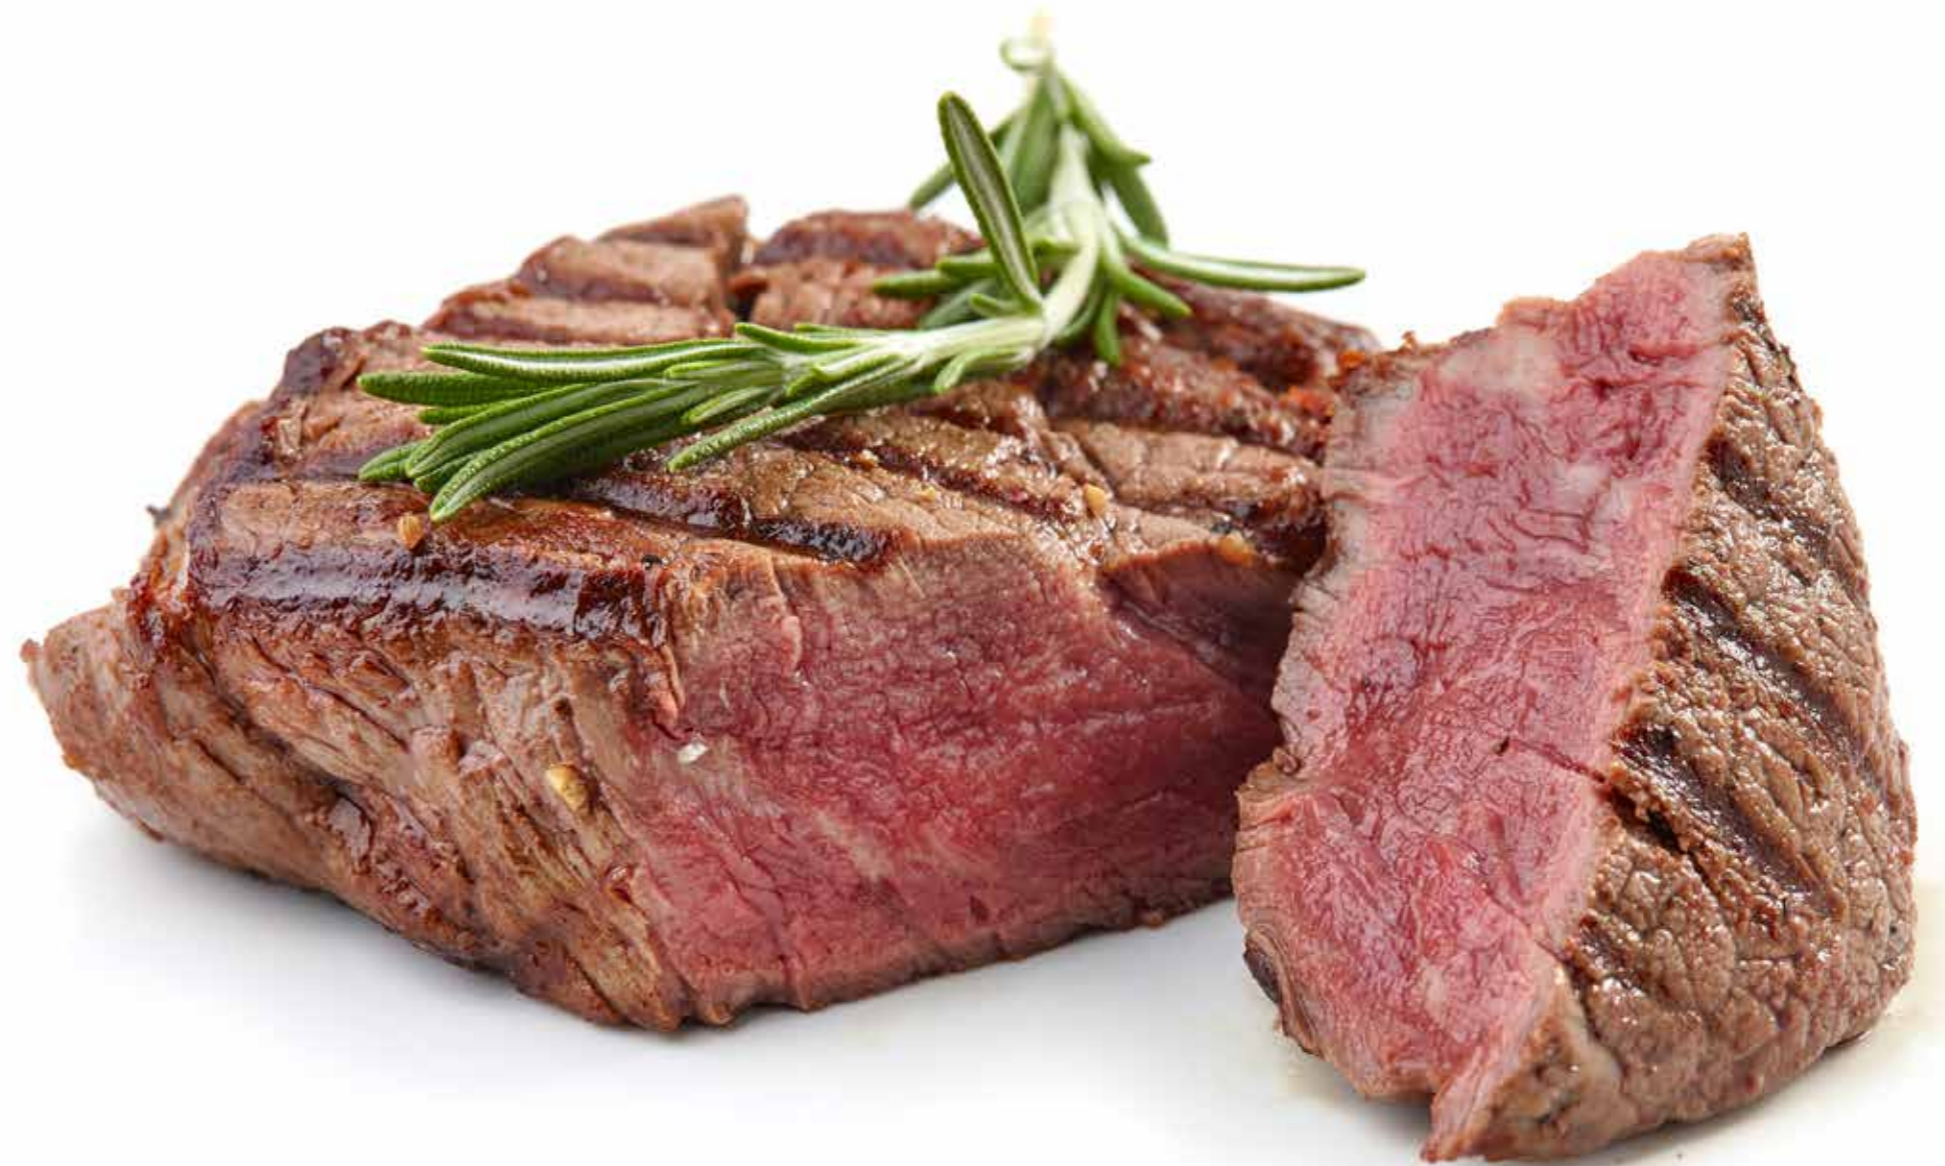

Optimum Hot Air Circulation

Through the concealed fan heater, hot air is evenly distributed throughout the cavity without cold spot.

Top and Bottom Heaters

Top and bottom heaters enable users to achieve better baking results. With the additional enamel baking trays, pizzas are crispy and tasty.

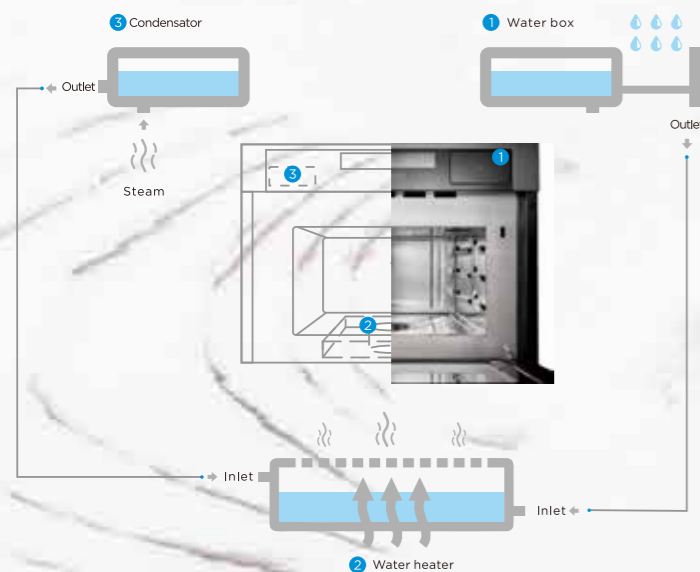

Healthy Cuisine with steam cooking

Unlike conventional cooking, the direct and immediate heat exchange retains most nutrition (vitamin, protein, fiber, etc.) in food, while significantly reduces the excessive fat and oil.

Healthy cuisine is achievable with steam cooking.

Efficiency cooling system

Optimum Hinge

Hinges are the critical component for door structure. Our compact oven use the manganese-based alloys to strengthen the mechanical properties for the long-lasting durability.

Stainless Steel Interior

Anti-rust stainless steel interior provides long-lasting life span and stylish appearance.

LED Displays

LED display offers great resolution and contrast level which makes reading clear and easy.

Soft-touch Water Tank

Simply touch the hidden water tank and it will open softly, providing elegant and effortless operation without single detail left.

WARMING DRAWER

Easy open/close

Everyone can now open and close the drawer by simply touching the door surface - even with their elbows.

Consistent warming & low temperature cooking

Keep your dishes warm at the perfect serving temperature, or pre-heat the tableware to pleasant touch, our warming drawer will do all these for you.

With advanced temperature control system, the warming drawer can also act as a cooking appliance, for low temperature cooking.

Safety

Your safety is always our priority. All components of the warming drawer are hidden, preventing potential risk; heating power will automatically switch off when the drawer is open, and turn on when it is closed.

TCN14J6D

LED display + Touch Control

Cavity

22L

Functions

Dough proving
Gentle cooking (slow-cooking)
Yoghourtf ermentation
Thawing (Defrost & Soften)
Keep warm
Pre-warming & tableware sterilizing

Specification

Tempe rature range: 40-80°C
Maximum weight capacity: 25kg
Cavity dimensions (WxDxH , mm): 548×420×97
Gross dimensions (WxDxH , mm): 595×561×141
Package dimensions (WxDxH, mm): 705×675×210
Loading capacity (20'/40'/40'HD): 264/561/612
Gross weight/Net weight (kg): 21.0/18.0
